CVC Products

Everything for a reason

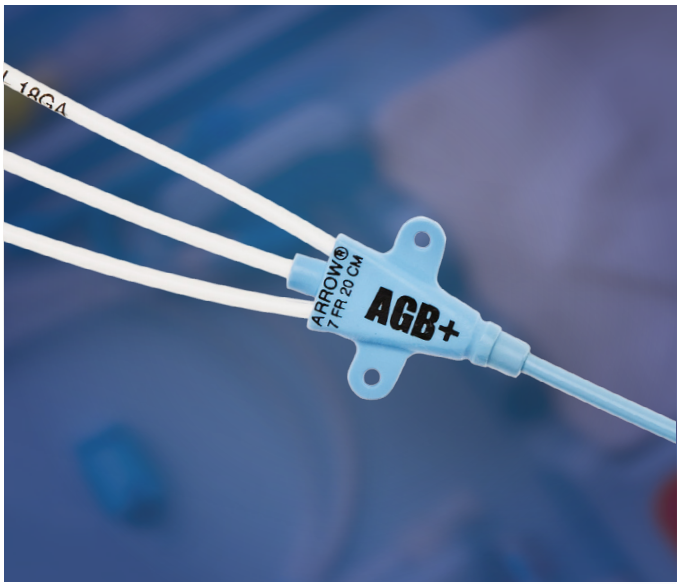

Teleflex™

Everything for a Reason

At Teleflex™, we never stop thinking about what matters to you and your patients - it's our entire product development philosophy, methodology and culture. Every detail matters. That's why there's a reason behind everything we do.

Arrowg+ard Blue Plus™ CVCs
to **Reduce Infection**[1-4]

The Arrow™ ErgoPack™ System - NZ Only
to **Optimise Efficiency**

Clinical guideline support
to **Improve Compliance**[5-8]

Your purpose is our purpose

We've been innovating with Arrow™ CVC products for more than four decades. That's because we share your commitment to giving clinicians the tools they need to:

Optimise patient outcomes
in step with patient needs

Minimise the risks and costs
of central line-associated infections by adhering to best practice guidelines[5-8]

Efficiently manage
inventories and streamline procedures

Continuing the evolution

We want to help you stop central line-associated bloodstream infections (CLABSI).

That's why we have our powerful max barrier solution and made it available in New Zealand —representing our best CVC solution on the market.

In Australia Costs related to CLABSI average

$34,843 per infection.[9]

Arrowg+ard Blue Plus™ CVCs have been shown to reduce CLABSI by

67-100%[1-4]

Minimising the risk and cutting the cost of infections.

The cost of a single CLABSI averages

$34,843 per infection.[9]

Arrowg+ard Blue Plus™ CVCs offer

comprehensive and broad-spectrum antimicrobial protection.[10-11]

Preventing even one infection per every 100 catheters

makes an investment in better protection a prudent financial decision.

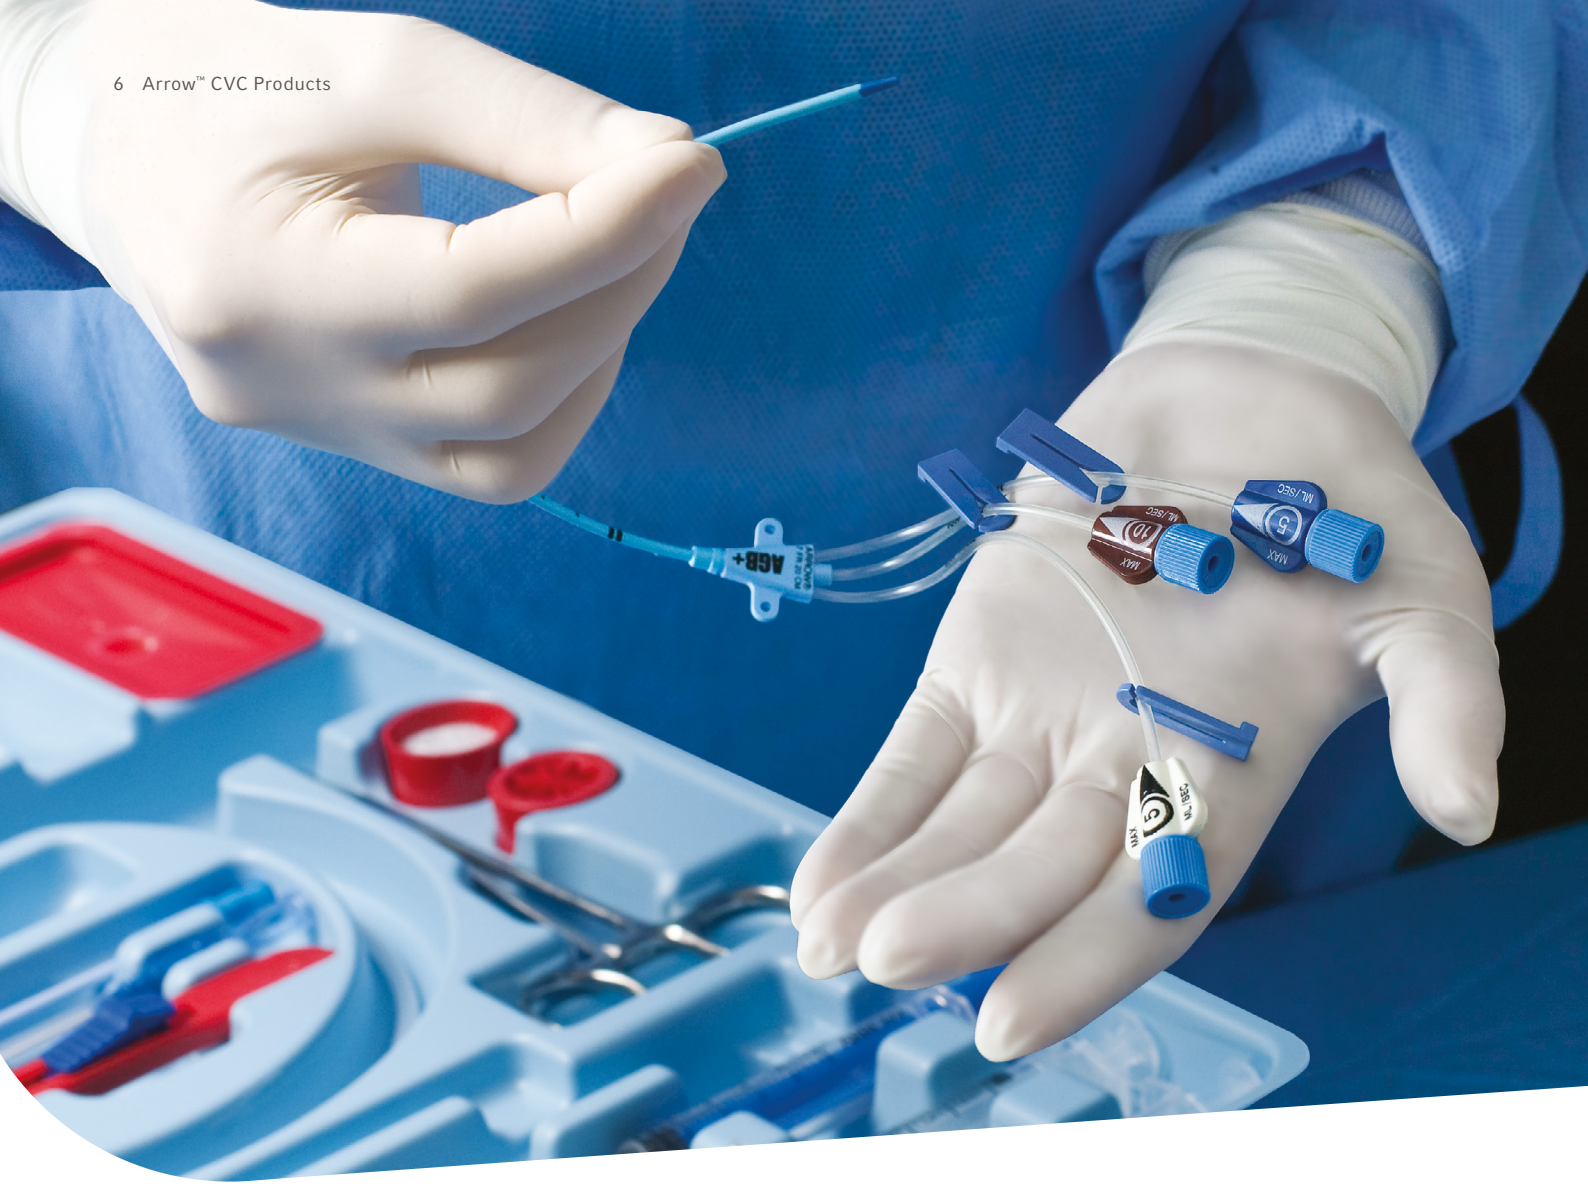

Give your clinicians the right tools to optimise outcomes and minimise costs

- Products backed by over 40 years of research and innovation
- Antimicrobial Arrowg+ard Blue Plus™ CVC products —Powerful, broad-spectrum antimicrobial protection[10-11]
- Demonstrated 67-100% reduction in central line-associated bloodstream infections[1-4]

Highest recommendation in third-party guidelines:[5-8]

- **CDC** Category 1A & 1B recommendations
- **SHEA** Guidelines
- **INS** Standards of Practice
- **OSHA** Bloodborne Pathogens Standard

We make it easy and cost-effective, to do the right thing.

- Standardise vascular access across your system
- Facilitate adherence to third-party guidelines
- Maintain a high standard of patient care
- Improve efficiencies
- Control costs and risks from infections

The Arrow™ ErgoPack™ System integrates the tools clinicians need to defend against CLABSI, arranged in an ergonomic top-to-bottom/left-to-right configuration that can help minimise scattered sharps and blood spills, helping you stay compliant with multiple guidelines[5-8], including CDC, SHEA, INS, and OSHA's Bloodborne Pathogens Standard.

The Teleflex™ Partnership

Smart medicine. Smart business.

System configurations to meet your standards of care

Standardise vascular access and maintain a high standard of patient care.

Right line, Right Patient, Right Time

Teleflex™ ANZ is committed to ensuring you have the optimal vascular access device for your patient

Teleflex Academy enhance skills and inspire confidence

Teleflex Academy assists in educating healthcare organisations and individual clinicians on the latest techniques relating to vascular access
